Education & Certification

Bachelor of Science in Information Science   2020 – Present
University of Maryland, College Park   (Expected Graduation Fall 2024)

Projects

- Created a Web application called Petsily which was created as a part of a hackathon project (Bitcamp 2023) which acts as a social media/Online Store for Animals.

- Participated in the Annual Info Challenge 2023. We conducted a Data Analysis on a UMD Global Classroom Participant data set to determine the trends in demographic, gender, and other factors over the period of COVID and after. We used Excel to clean the data and then R Studio and Tableau to skim through the data to find trends and plot necessary tables and graphs.

- Created a web application called Class Finder which was created as a part of a hackathon project (Bitcamp 2022) to help students find accessible study areas around campuses.

- Participated in the Annual Info Challenge 2022. The project topic which I was involved in was data analysis in the Paycheck Protection Plan.
